

Amendments to the Specification:

Please amend the paragraph beginning at page 6, line 29 of the specification as follows:

Particularly, the lens 23 includes an upper lens portion 231 for the position lamp provided at an upper location and a lower lens portion for the stop lamp provided at a lower location, and a boundary line K between the lens portions 231 and 232 forms a V shape. While the lens portions 231 and 232 are disposed at the upper and lower locations for the upper lamp portion 20 and the lower ~~map~~ lamp portion 21, respectively, they are positioned adjacent each other to maintain a sense of unity. In particular, the lower lens portion 232 is disposed in such a manner that it envelops the lower half of the upper lens portion 231 so that, upon lighting, the position lamp and the stop lamp further provide a sense of unity.

Please amend the paragraph beginning at page 9, line 15 of the specification as follows:

While the upper lens portion 231 corresponds to the upper lamp portion 20 and the lower lens portion 232 corresponds to the lower lamp portion 21, they are positioned adjacent each other to maintain a sense of unity. Particularly, since a boundary line K between the lens 20 and the lens 21 has a V shape and the lower lens ~~portion 212~~ 232 envelops the lower half of the upper lens ~~portion 203~~ 231, a further sense of unity is provided upon lighting.
